Specification Grade Sealed Downlights
for Your Most Challenging Applications

Sealed Specification Grade Downlight Luminaires

Now includes Tunable White LED
The Downlights You Need to Seal Any Deal

Avoid the headache of downlights that don’t live up to your demanding applications. Kenall’s modular downlights are designed to stay tightly sealed and perform efficiently for years in a variety of environments, including areas where damp and wet location listings just aren’t enough.

One simple, modular design accommodates both regressed and flush lens trim options, and Ingress Protection is an integral part of the design — so there are no surprise upcharges.

Now available with Tunable White LED and Indigo-Clean® technologies, Kenall’s downlights are tailored to fit the needs of the most challenging applications, including hospitals and clinics, behavioral health facilities, cleanrooms, containment areas, food and pharmaceutical processing areas, transportation, transit and other public spaces, military installations and educational facilities.
Avoid the Headache of Failed Seals... Specify Kenall Sealed Downlights

Cracked Lens  Ingress of Moisture  Ingress of Mold

Ingress of Dust  Ingress of Bugs
Sealed Downlights

One Simple Modular Design, Two Lens Types

The Flexibility You Need with NO Hidden Costs
The modular design of these downlights incorporates Ingress Protection at no additional cost and, for specific applications, can be specified with either regressed or flush lenses. Then your downlights ship in two phases. The result? Your lighting project is completed on time and within budget.

Sealed Regressed Lens

Kenall’s sealed, regressed lens downlight features a narrow trim ring, which makes it ideal for architectural applications that value a sealed fixture while providing ample illumination and reduced glare. The fixture is ideal for healthcare facilities, restaurants and commercial kitchens.

Sealed Flush Lens

Kenall’s flush lens downlight is designed for extreme environments, including those where accidental damage or vandalism are common. The fixture is ideal for behavioral health facilities, schools and public spaces, canopies and soffits.

Two-Phase Shipping, Easy Installation.
This downlight series ships in two phases. The rough-in frame can be installed first and is designed to fit various ceiling thicknessness. Then the trim housing section can be installed once the ceiling is finished; torsion springs or captive fasteners provide a positive seal to the ceiling surface.
Tune Your Lighting to Your Needs

What Is Tunable White Technology?
Tunable white technology enables the user to independently control both color temperature and intensity of light within a given application. This provides the ability to change the color of light from warm to neutral to cool in appearance, over time, based on the needs of the occupant or the space.

Recent studies on health, productivity and comfort suggest that the ability to tune the color temperature of light based on application, event need, or occupant preference yields significant benefits.

Kenall combines our white color tuning with dimming to provide even greater flexibility in adjusting the ambience of these spaces:

- Healthcare
- Correctional
- Education
- High Abuse
- Cleanroom & Containment
- Behavioral Health

Controls
The key to achieving the perfect balance of color and intensity of light is the use of appropriate controls. Kenall offers a choice of 0-10V Dimming or Digital Addressable Lighting Interface (DALI), for more sophisticated capabilities. Both options provide the ability to interface with your choice of building automation systems. For your convenience, Kenall’s tunable white products are compatible with a wide range of controls; from the simpler Pico and EcoSystems® to the more sophisticated Fresco™ system. Consult factory regarding specific controls compatibility.

The Primary Benefit of Tunable Lighting: Circadian Entrainment
Scientific studies have shown that when indoor light mimics the warm-to-cool cycle of natural daylight, people receive a number of benefits, including a more restful night’s sleep and greater alertness during the day. This circadian entrainment is especially beneficial for those who do not have access to natural daylight, such as shift workers, office workers, hospital and nursing home patients, and correctional inmates.
Sealed Downlights

Kill C. diff and Prevent It From Spreading

Indigo-Clean® MDLIC6 is a dual-mode luminaire utilizing a dual-technology occupancy sensor that provides an effortless transition between white ambient mode when the room is in use, and Indigo disinfection mode when the room is not. MDLIC6 provides clinical grade control of C. diff* and is ideal for patient bathrooms, helping to prevent harmful bacteria from spreading to the patient room.

How Indigo-Clean Works

- The 405nm light targets bacteria and produces intracellular Reactive Oxygen Species (ROS).
- Similar to bleach, these ROS kill the bacteria and prevent it from repopulating the space.
- The 405nm light emitted from Indigo-Clean Technology reflects off of walls and surfaces.

Visible light spectrum showing the active element in Indigo-Clean

MDLIC6 switches to white disinfection mode when the room is occupied.

Create a Cleaner, Safer Facility with On-Demand Environmental Disinfection

Kenall’s sealed downlight series offers several options tailored to your space, including the ability to add Indigo-Clean Technology, a patented, state-of-the-art technology that safely kills harmful bacteria such as Staph*, including MRSA**. This revolutionary new technology combines white light with 405nm indigo light to provide on-demand disinfection with the flip of your lighting switch.

This icon indicates that the luminaire can be specified with the Indigo-Clean Technology option.

Sealed Regressed Lens Downlights

For Environments where Ingress Protection Really Matters....
Demand Kenall Sealed Regressed Lens Downlights
**Sealed Regressed Lens Downlights**

Expertly Designed with Kenall’s Signature Features

Kenall’s streamlined downlight design includes many of the signature Kenall features you’ve come to rely on to make installation and maintenance fast and easy, while also ensuring a long LED life.

- Adjustable, universal mounting bracket; galvanized steel construction
- Sealed regressed lens
- Reflector: specular, semi-specular or white
- Die-cast aluminum heatsink protects LEDs and ensures long life
- Cold rolled steel, type 304 stainless steel and die-cast aluminum trim ring options.
- Antimicrobial finish standard for healthcare applications.
- Flexible dimming capabilities: Dim to Dark or Dim to 1%; 0-10V, DALI or Lutron EcoSystem

**Suggested Applications**

- Healthcare
- Food Service
- Commercial Kitchens

Sealed Downlights

MedMaster™ 6” Regressed Downlights...

MedMaster™ M4DL6 for Surgical Suites
- Delivered lumen range: 880–5,543 lm
- Input Power: 15–62W
- CCT: 3000K, 3,500K, 4,000K, 5,000K
- CRI: 80 or 90
- Conductive emissions controlled per MIL-STD-461F
- Aluminum, stainless or cold-rolled steel trim ring
- Available with Indigo-Clean Technology

Indigo-Clean® MDLIC6 Downlight
Switchable: White Ambient Mode and Indigo Disinfection Mode
- Delivered lumen range: 1,515–2,050 lm
- Input power: 29–40W
- CCT: 3000K, 3500K, 4000K, 5000K
- Continuous environmental disinfection
- Sporicidal - Proven to kill 70% of C. diff in 24 hrs.*
- Provided IC75 occupancy sensor switches automatically to max disinfection mode when room is unoccupied
- High performance LEDs deliver high visual acuity

* SGS Lab Report# - 09S17053798. Contact manufacturer for a copy of this report.
...for Healthcare Applications

**MedMaster™ MRIDL6 for MRI Suites**
- Delivered lumen range: 655–2,953 lm
- Input Power: 16 – 37W
- CCT: 3000K, 3500K, 4000K, 5000K
- CRI: 80 or 90
- Non-ferrous construction
- 24V DC
- RF-EMI emissions compliant

**MedMaster™ MDL6 for Healthcare Environments**
- Delivered lumen range: 768–5,543 lm
- Input Power: 15 – 62W
- CCT: 3000K, 3500K, 4000K, 5000K
- CRI: 80 or 90
- Die-cast aluminum, cold-rolled steel or stainless steel trim ring
- Wall-wash option
- Available with Indigo-Clean Technology & Tunable White Technology
EnviroPro™ 6” Regressed Lens Downlight for Food Processing

- Delivered lumen range: 880–5,543 lm
- Input Power: 15 – 62W
- CCT: 3000K, 3500K, 4000K, 5000K
- CRI: 80 or 90
- Stainless steel trim ring
- Wall-wash option
Sealed and Regressed Lens Downlights

MedMaster 4" Sealed Downlights for Healthcare Applications

Kenall's 4" downlights provide a targeted design aesthetic with your choice of a smaller round or square aperture. Their tighter beam spread is ideal to highlight task areas, as a chart light, or for use over a nurses' station.

MedMaster™ MDL4 for Healthcare Environments
- Delivered lumen range: 983–2,536 lm
- Input Power: 16 – 31W
- CCT: 3000K, 3500K, 4000K, 5000K
- CRI: 80, 90
- Available with Indigo-Clean Technology & Tunable White Technology

MedMaster M4DL4 for Surgical Suites
- Delivered lumen range: 983–2,536 lm
- Input Power: 16 – 31W
- CCT: 3000K, 3500K, 4000K, 5000K
- CRI: 80, 90
- Available with Indigo-Clean Technology & Tunable White Technology

MedMaster MRIDL4 for MRI Suites
- Delivered lumen range: 930–1310 lm
- Input Power: 15W
- CCT: 3000K, 3500K, 4000K, 5000K
- CRI: 80, 90

MedMaster MDL4S for Healthcare Environments
- Delivered lumen range: 1,046–2,640 lm
- Input Power: 16 – 31W
- CCT: 3000K, 3500K, 4000K, 5000K
- CRI: 80, 90
- Available with Indigo-Clean Technology & Tunable White Technology

MedMaster M4DL4S for Surgical Suites
- Delivered lumen range: 1,046–2,640 lm
- Input Power: 16 – 31W
- CCT: 3000K, 3500K, 4000K, 5000K
- CRI: 80, 90
- Available with Indigo-Clean Technology & Tunable White Technology

MedMaster MRIDL4S for MRI Suites
- Delivered lumen range: 990–1,357 lm
- Input Power: 15W
- CCT: 3000K, 3500K, 4000K, 5000K
- CRI: 80, 90

• Delivered lumen range: 715–5,305 lm
• Input Power: 15 – 62W
• CCT: 3000K, 3500K, 4000K, 5000K
• CRI: 80 or 90 min
• Tamper-proof fasteners
• Wall-wash option
• Available with Indigo-Clean Technology & Tunable White Technology

This product complies with the Buy American Act: manufactured in the United States with more than 50% of the component cost of US origin. It may be covered by patents found at www.kenall.com/patents. Content of specification sheets is subject to change; please consult www.kenall.com for current product details.
Sealed Flush Lens Downlights

Kenall 6" Sealed, Flush Lens, Downlights for Challenging Applications
SimpleSeal™ CDL6 for Cleanroom and Containment Applications
- Delivered lumen range: 794–5,305 lm
- Input Power: 15–62W
- CCT: 3000K, 3500K, 4000K, 5000K
- CRI: 80 or 90
- Available with Tunable White Technology

EnviroPro™ EPDL6 for Food Processing
- Delivered lumen range: 794–5,305 lm
- Input Power: 15–62W
- CCT: 3000K, 3500K, 4000K, 5000K
- CRI: 80 or 90

LuxTran™ TDL6 for Transit/Transportation Applications
- Delivered lumen range: 950–5,305 lm
- Input Power: 15–62W
- CCT: 3000K, 3500K, 4000K, 5000K
- CRI: 80

Millenium™ HADL6 for High Abuse Applications
- Delivered lumen range: 715–5,305 lm
- Input Power: 15–62W
- CCT: 3000K, 3500K, 4000K, 5000K
- CRI: 80 or 90
- Available with Indigo-Clean Technology

Kenall's luminaires are expertly designed in our state-of-the-art, vertically integrated, static-controlled manufacturing facility in Wisconsin. This enables us to provide tight control over the entire development process from fixture design and engineering to full-fledged metal fabrication, paint, assembly and shipping. We also take great care in sourcing only the highest-quality components to assure optimal product performance.

Our products comply with the Buy American Act: manufactured in the United States with more than 50% of the component cost of US origin.
Listings and Certifications

Multi-use downlights must satisfy a large number of demanding lighting and environmental requirements. Please refer to specific listings within each section of this guide to determine appropriate product listings.

ETL — A product bearing the ETL Listed Mark is determined to have met the minimum requirements of prescribed product safety standards as certified by a Nationally Recognized Testing Laboratory (NRTL). The mark also indicates that the manufacturer’s production site conforms to a range of compliance measures and is subject to periodic follow-up inspections to verify continued conformance.

IP64 — UL Certified IP64 per IEC 60598 ensures that the enclosure is dust-tight and protected against splashing water without any harmful effects.

IP65 — UL Certified IP65 per IEC 60598 ensures that the enclosure is dust-tight and protected against jet streams of water from any direction without any harmful effects.

NSF2 — An NSF2 Listing denotes that the luminaire has been evaluated for corrosion resistance, cleanability and the ability of exposed material to withstand normal wear. This supports the infection control standards established by healthcare facilities as it indicates that the luminaire is easy to sanitize.

MIL STD 461F — Military Standards testing measurements cover both radiated and conducted electromagnetic emissions in addition to maximum allowable amounts of emitted energy based on both frequency range and field strength. Luminaires meeting MIL STD 461F pose the lowest possible likelihood of causing EMI-related issues.

CCEA Approved — The City of Chicago Environmental Air (CCEA) rating ensures that the luminaire is inherently airtight. Wiring and/or branch circuit terminations are sealed off and gasketed from the plenum air space. This listing ensures that the luminaire is sealed to limit air flow from the room side to the plenum.

ICT — Indicates white, ambient Kenall luminaires using Indigo-Clean Technology, which kills harmful bacteria on-demand, including Staph, such as MRSA.

Tunable White — Tunable white technology enables the user to independently control both color temperature and intensity of light within a given application. This provides the ability to change the color of light from warm to neutral to cool in appearance, over time, based on the needs of the occupant or the space.

Peace of Mind Guarantee — Kenall’s High Abuse luminaires are designed and built to take exceptional physical punishment. When installed according to our instructions, Kenall will repair or replace any unit rendered inoperable due to physical abuse for the life of the product installation.

State-of-the-art, certified testing facility

Kenall is equipped with a state-of-the-art certified safety laboratory, providing comprehensive in-house testing capabilities:

- **Thermal Testing**
  - Cold Weather Testing
  - High Temperature Testing
- **Photometrics Testing**
  - Goniophotometer
- **Ingress Testing**
  - Solids and Particulates Testing
  - Water Ingress Testing
Lighting Challenging Environments

Kenall offers luminaires designed according to industry best practices and certified performance standards in each market segment we serve. From high abuse fixtures with an exclusive Peace of Mind Guarantee® against breakage and healthcare fixtures sealed for infection control, to sealed enclosure fixtures that comply with stringent military standards for RFI/EMI and food processing fixtures that carry mission critical NSF, NEMA and IP ratings, our fixtures are designed with your specific needs in mind.

**Guaranteed against breakage for the life of the installation.**

**Main Applications**
- Schools & Universities
- Public environments
- Military
- & stairwells

**Engineered to the specialized demands of healthcare environments with particular attention to cleanability and infectious control.**

**Main Applications**
- Patient rooms
- Surgical suites
- MRI
- Labs

**One-piece, seam-welded enclosures for containment, controlled and sealed spaces.**

**Main Applications**
- Pharmaceutical & research labs
- Cleanrooms
- Corrosive environments
- Hazardous locations

**Sealed enclosure lighting for hazardous and extreme industrial applications**

**Main Applications**
- Warehouses
- Manufacturing
- Natatorium
- Cold storage
Lighting Challenging Environments

Whether you’re lighting a healthcare facility and need fixtures that support effective infection control and cleanability, or a tunnel, transit platform or parking facility that calls for features like corrosion-, shock- and vibration-resistance, Kenall can help at every turn. And for dependable task lighting that requires environmental integrity and versatility, or emergency exit lighting that meets life safety codes, you can depend on Kenall.

**Correctional**

Heavy gauge, welded enclosures to deter even the most determined attempts to destroy, enter or vandalize.

Main Applications
- Cells
- Common areas
- Behavioral health
- Dayrooms

**Transportation**

Meeting the specialized demands of transportation-related structures for high performance, corrosion resistance and serviceability.

Main Applications
- Tunnel & underpass
- Platform & depot
- Parking deck & surface lot
- Bridges

**Task Lighting**

High efficiency LED, modular undercabinet lighting for professional spaces.

Main Applications
- Nurses stations
- Labs/MRI suites
- University dorms & administration areas
- Military/Government

**Emergency**

High-abuse, extreme-environment LED exit and emergency egress lighting.

Main Applications
- Schools & Universities
- Recreational
- Sealed & correctional environments
- Outdoor/cold weather/extreme conditions
