

Kenall's MedMaster™ MAEC Series has been specifically designed to provide a combination of ambient and exam room lighting conveniently into a single fixture. The NSF listed fixture features asymmetric lamping and a dual lens to provide both directional exam and indirect ambient lighting. The functional versatility of the MAEC Series eliminates the need for separate fixtures to address the patient's ambient and exam room lighting requirements, streamlining the overall aesthetics of the patient room.

### MAEC Series

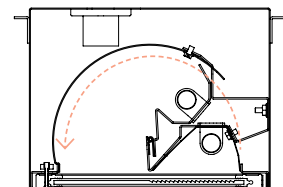

- Available in 4' length
- Features a T5 and T5HO lamping combination
- One-piece, seam-welded housing
- Heavy-duty, marine grade, extruded aluminum doorframe featuring closed cell gasketing for infection control
- Lamp assembly rotates forward for ease of relamping and maintenance

### Additional Product Details

Dual-function lens can provide both directional exam and indirect ambient illumination simultaneously.

The ambient lamp assembly rotates forward for easy access when relamping.
