

LuxTran™ RD700 Series

Remote Driver for Tunnel Lighting Applications

RD700 Series

- Stainless steel housing with marine-grade aluminum heat sinks
- Suitable for placement most convenient to servicing
- Wall or ceiling orientations; ADA compliant for wall orientations
- High-efficiency (>90%) drivers with dedicated heat sinks and 20kV built-in surge suppression for long-life operation
- Simplified servicing of drivers via patent-pending tool-less, quick-release mechanism
- 10-year limited product warranty

Tunnel Lighting

The RD700 Remote Driver powers Kenall LTL and LTS Series LED luminaires with constant-current DC for easy serviceability. Hot-swappable drivers can easily be removed or replaced without shutting the system down. A patent-pending, tool-less, quick-release mechanism also makes servicing the drivers easy.

Kenall tunnel luminaires are completely customizable to address the highly complex and challenging needs of tunnel applications.

Contact Michael Maltezos at 847-507-4531 or Mmaltezos@kenall.com to assist you with your next tunnel project.
