

TEKLINK™ TL2000PS FOR SENScape™ Parking Suite Control System Specification

SPG-TL2000PS SYSTEM

PRODUCT FEATURES:

- » Embedded Image Sensor
- » Report Car Counting Data
- » Report Lighting Control Data
- » Wireless Communication

PROJECT INFORMATION

Job Name _____

Fixture Type _____

Catalog Number _____

Approved by _____

SPECIFICATIONS:

PRODUCT BRIEF: TekLink TL2000PS is an extension of the TL2000 lighting control system utilizing an embedded image sensor to provide features beyond standard lighting control. The system consists mainly of luminaire-integrated lighting controllers (BORGs), embedded Image Sensors, Bridges, and a Gateway. This specification provides information on the luminaire level control components. Please see the [Bridge and Gateway Specification](#) sheet for additional system information.

TEKLINK TL2000PS BORG: Integral controllers located in LED luminaires or as stand-alone devices; TL2000PS BORGs (Board on Radio Grid) measure and record system activity while supporting data captured from an image sensor. The LED luminaires react to changes in the environment based on a programmable lighting schedule. TL2000PS BORGs use wireless communication designed to the IEEE 802.11n standard.

TL2000PS IMAGE SENSOR: Operates by low-voltage power provided by the BORG. The image sensor provides advanced feature capability with video analytics, supporting car counting data reporting, and standard lighting control features for occupancy detection and light level sensing.

INSTALLATION: Control components and sensor integrated in to SPG18 housing at factory.

WARRANTY: Limited three (3) year warranty.

NOTE: See SPG18 spec sheet for TekLink™ TL2000PS control system ordering information.
